

ANDARAS

CARIGNANO DEL SULCIS DOC

TECHNICAL DATA

Grape Variety: 100% Carignano

Soil: Coastal soils of marine origins

Altitud: A few meters above sea level
(0-10 m a.s.l.)

Training system: Alberello (bush vines)

Vines: Ungrafted (pre-phylloxera)

Average age : 25 years

Planting density: 8.000 vines per hectare

Yeald: 5 tons per hectare

Production: 5.333 bottles (75 cl)

IDENTITY

Old, ungratted vines on sandy coastal soils close to the sea.

A pristine, extreme environment that preserves varietal integrity and defines an elegant, timeless style.

THE 2022 HARVEST

2022 - Intensity / Concentration

A hot and dry harvest characterized by scarce rainfall for most of the growing cycle.

Pre-phylloxera vineyards, thanks to their resilience and proximity to the sea, maintained balance.

Physiologically early but concentrated harvest, in the first week of September.

"2022 is the most extreme vintage of the period: heat and drought. This is where the ungrafted vineyard by the seacomes into play, maintaining equilibrium. The result is impressive concentration and focus, al while retaining its identity."

FOOD PAIRING

Aged cheeses

Grilled fish

Pizza
